Subject: CSO/SWO RTC document

Good Afternoon Alice,

I had a question for you regarding the RTC document which Tierra is preparing to submit. When going through the comments in detail, we noticed that in some cases, USEPA asks several questions within one particular comment. When this case occurs, we have structured responses as follows (by adding an alphabetical letter after the comment number).

“ comment 1a, Tierra will....”

“comment 1b, Tierra will address....”

In an effort to organize the responses, and be consistent, would USEPA take objection to Tierra adding an alphabetical letter (i.e., a, b etc.) after the comment. The text in your comment will not be changed, but simply a letter will be added at the end, so that when referencing comment “1b” , the responses in which Tierra is preparing are able to be linked to the specific matching comment which EPA provided. If this approach is not acceptable, we can remove these letters from our responses, and adjust our format accordingly.

Please let me know if you want to discuss,

Thanks

Brian Mikucki
